RIJKSUNIVERSITEIT GRONINGEN

Ion induced radiation damage on the molecular level

Proefschrift

ter verkrijging van het doctoraat in de
Wiskunde en Natuurwetenschappen
aan de Rijksuniversiteit Groningen
op gezag van de
Rector Magnificus, dr. F. Zwarts,
in het openbaar te verdedigen op
vrijdag 30 november 2007
om 14:45 uur

door

Fresia Alvarado Chacón

geboren op 29 december 1977
te San José, Costa Rica

Promotor: Prof. dr. ir. R. Hoekstra
Copromotor: Dr. T. Schlathölter

Beoordelingscommissie: Prof. dr. R. M. A. Heeren
Prof. dr. B. Huber
Prof. dr. W. L. Meerts

ISBN (printed version): 978-90-367-3193-5

ISBN (electronic version): 978-90-367-3263-5

To my grandparents

Este trabajo es dedicado a:
abuela Edith y abuelo Oscar
abuela Aurelia y abuelo Rubén

Contents

1. Introduction	1
1.1. General introduction	1
1.2. Outline	5
2. Experiment	7
2.1. ECRIS and beam transport	8
2.2. Experimental setup	9
2.2.1. General features	9
2.2.2. Chopping schemes	10
2.2.3. Gas phase targets	12
2.2.4. The reflectron TOF	12
2.3. Producing neutral projectiles	14
2.4. Data analysis	15
2.4.1. Information from first-stop spectra	16
2.4.2. Extraction of the kinetic energies for different fragments	18
2.4.3. Correction for transmission	20
2.5. Experiments performed in other facilities outside KVI	22
2.5.1. Collision induced dissociation under energy control at LASIM	22
2.5.2. The cluster source at CIRIL/GANIL	23
3. Theoretical concepts	25
3.1. Scenario for ion-molecule interaction	26
3.1.1. Charge exchange	26
3.1.2. Fragmentation process	27
3.2. Molecular structure	29
3.2.1. Theoretical background	29

3.2.2. Model chemistries	30
3.2.3. GAUSSIAN calculations	33
4. H₂O dissociation by protons and alpha particles	35
4.1. Gas phase water molecules	36
4.2. Fragmentation of water molecules	39
4.3. Single ionization	41
4.4. Double ionization	42
4.5. Triple ionization	46
4.6. Conclusions	47
5. Particle induced fragmentation of nucleobases	49
5.1. How it started	50
5.2. The nucleobase adenine	52
5.3. Adenine fragmentation by alpha particles	53
5.4. From charged to neutral projectiles	53
5.4.1. Formation of adenine ²⁺	55
5.4.2. The dominant fragments	55
5.4.3. The different groups	56
5.4.4. Delayed fragmentation	57
5.4.5. Coincidence studies	61
5.5. Discussion	61
5.6. Conclusions	63
6. Deoxyribose	65
6.1. The weakest link?	66
6.2. Fragment formation dependence on temperature	67
6.3. Comparison with nucleobases	67
6.4. Quantification of the damage	73
6.5. Energy loss of the projectile ion	77
6.6. Conclusions	80
7. Clusters of nucleobases	83
7.1. From isolated nucleobases to nucleobase clusters	84
7.1.1. Thymine	85
7.1.2. Uracil	87
7.1.3. Cytosine	89
7.1.4. Adenine	91
7.2. Cluster stability	94
7.3. Coincidence data	95
7.4. Mixed clusters	98
7.5. Conclusions	102

8. Summary	103
Atomic units and conversion factors	107
Abbreviations	109
Bibliography	111
Samenvatting	121
Resumen	127
List of Publications	133
Thanks	135
